Glossary of Acronyms

Acronym	Description
AFS	Available For Sale
ALLL	Allowance for Loan and Lease Losses
C&I	Commercial and Industrial
CAP	Capital Adequacy Process
CRE	Commercial Real Estate
EAD	Exposure At Default
GAAP	Generally Accepted Accounting Principles in the United States
HTM	Held to Maturity
HVCRE	High Volatility Commercial Real Estate
ISDA	International Swaps and Derivatives Association
MD&A	Management Discussion and Analysis
MDB	Multilateral Development Bank
OTC	Over-The-Counter
PFE	Potential Future Exposure
PSE	Public Sector Entity
RWA	Risk Weighted Assets
SSFA	Simplified Supervisory Formula Approach
T-Bill	Treasury Bill
T-Bond	Treasury Bond
T-Note	Treasury Note
VIE	Variable Interest Entity

Introduction

Company Overview

Huntington Bancshares Incorporated (Huntington or HBI) is a multi-state diversified regional bank holding company organized under Maryland law in 1966 and headquartered in Columbus, Ohio. Through its subsidiaries, including its bank subsidiary, The Huntington National Bank (the Bank), Huntington is engaged in providing full-service commercial, small business, consumer banking services, mortgage banking services, automobile financing, equipment leasing, investment management, trust services, brokerage services, insurance programs, and other financial products and services. Huntington’s banking offices are located in Ohio, Michigan, Pennsylvania, Indiana, West Virginia, and Kentucky. Select financial services and other activities are also conducted in various other states. International banking services are available through the headquarters office in Columbus, Ohio and a limited purpose office located in the Cayman Islands and another in Hong Kong. When we refer to “we”, “our”, and “us” in this report, we mean Huntington Bancshares Incorporated and our consolidated subsidiaries. When we refer to the “Bank” in this report, we mean our only bank subsidiary, The Huntington National Bank, and its subsidiaries.

The Board of Governors of the Federal Reserve System (Federal Reserve Board) is the primary regulator of HBI, a bank holding company under the Bank Holding Company Act of 1956 (BHC Act). As a bank holding company, HBI is subject to consolidated risk-based regulatory capital requirements which are computed in accordance with the applicable risk-based capital regulations of the Federal Reserve Board. These capital requirements are expressed as capital ratios that compare measures of regulatory capital to risk-weighted assets (RWAs). Capital levels are subject to qualitative judgments by the regulators on capital components, risk weightings and other factors. In addition, we are subject to requirements with respect to leverage.

Regulatory Capital and Capital Ratios

In 2013, the Federal Reserve voted to adopt final capital rules implementing Basel III requirements for U.S. Banking organizations. The final rules establish an integrated regulatory capital framework and implement in the United States the Basel III regulatory capital reforms from the Basel Committee on Banking Supervision and certain changes required by the Dodd-Frank Act. Under the final rule, minimum requirements increase for both the quantity and quality of capital held by banking organizations. Consistent with the international Basel framework, the final rule includes a new minimum ratio of common equity tier 1 capital to risk-weighted assets and a common equity tier 1 capital conservation buffer of 2.5% of risk-weighted assets. The rule also raises the minimum ratio of tier 1 capital to risk-weighted assets and includes a minimum leverage ratio of 4%. These new minimum capital ratios were effective for us on January 1, 2015, and will be fully phased-in on January 1, 2019. We are now subject to the standardized approach for calculating risk-weighted assets in accordance with subpart D of the final rule.

The following are the minimum Basel III regulatory capital levels, including a capital conservation buffer beginning in 2016, which we must satisfy to avoid limitations on capital distributions and discretionary bonus payments during the applicable transition period, from January 1, 2015, until January 1, 2019:

	Basel III Regulatory Capital Levels				
	January 1, 2015	January 1, 2016	January 1, 2017	January 1, 2018	January 1, 2019
Common equity tier 1 risk-based capital ratio	4.5 %	5.125 %	5.75 %	6.375 %	7.0 %
Tier 1 risk-based capital ratio	6.0 %	6.625 %	7.25 %	7.875 %	8.5 %
Total risk-based capital ratio	8.0 %	8.625 %	9.25 %	9.875 %	10.5 %

The final rule emphasizes common equity tier 1 capital, the most loss-absorbing form of capital, and implements strict eligibility criteria for regulatory capital instruments. The final rule also modifies the methodology for calculating risk-weighted assets to enhance risk sensitivity. Banks and regulators use risk weighting to assign different levels of risk to different classes of assets.

Table 1 – Scope of Application

The Basel III Regulatory Capital Disclosures and HBI's regulatory capital ratio calculations are prepared on a fully consolidated basis. The consolidated financial statements are prepared in accordance with U.S. GAAP and include the accounts of HBI and its majority-owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation. HBI is subject to the standardized approach for calculating risk-weighted assets.

Restrictions on the Transfer of Funds or Regulatory Capital within HBI

Dividends from the Bank to HBI are the primary source of funds for payment of dividends to our shareholders. However, there are statutory limits on the amount of dividends that the Bank can pay to HBI. Regulatory approval is required prior to the declaration of any dividends in an amount greater than its undivided profits or if the total of all dividends declared in a calendar year would exceed the total of its net income for the year combined with its retained net income for the two preceding years, less any required transfers to surplus or common stock. The Bank is currently able to pay dividends to HBI subject to these limitations.

Compliance with Capital Requirements

As of March 31, 2016, HBI had capital levels above the minimum regulatory capital requirements, as well as the well-capitalized standards established for prompt corrective action. For further detail on capital ratios, see Table 21 – Regulatory Capital Data in the 2016 First Quarter Report on Form 10-Q. Also, the aggregate amount of surplus capital in our insurance subsidiaries included in HBI consolidated Total Capital as of March 31, 2016 was \$12 million. No subsidiary had a capital shortfall relative to its minimum regulatory capital requirements as of this reporting date.

Table 2: Capital Structure

Common equity (i.e., common stock, capital surplus, and retained earnings) is the primary component of our capital structure. Common equity allows for the absorption of losses on an ongoing basis and is permanently available for this purpose. Further, common equity allows for the conservation of resources during stress, as it provides HBI with full discretion on the amount and timing of dividends and other distributions.

However, regulators and rating agencies include other non-common forms of capital (e.g., subordinated debt and preferred stock) in their calculations of capital adequacy. Accordingly, Huntington allows for the inclusion of these alternative forms of capital in its metrics for the tier 1 risk based capital and total risk based capital ratios.

The terms and conditions of HBI's capital instruments are described in the 2016 First Quarter Report on Form 10-Q as follows:

- Common stock and preferred stock terms and conditions are described on the Balance Sheet in HBI's Consolidated Financial Statements
- Trust preferred securities terms and conditions are described in Note 15–VIEs in the 2016 First Quarter Report on Form 10-Q
- Subordinated debt terms and conditions are described in Note 10 – Long-Term Debt in the 2015 Annual Report on Form 10-K

The components of HBI's capital structure are disclosed in MD&A Table 19-Capital Under Current Regulatory Standards (transitional Basel III basis) in the 2016 First Quarter Report on Form 10-Q.

Table 3: Capital Adequacy

We utilize a capital adequacy process (CAP) which, at a minimum, addresses requirements set forth in the Federal Reserve's *Seven Principles of an Effective Capital Adequacy Process*:

1. Sound foundational risk management
2. Effective loss estimation methodologies
3. Solid resource estimation methodologies
4. Sufficient capital adequacy impact assessment
5. Comprehensive capital policy and planning
6. Robust internal controls
7. Effective governance

Huntington's CAP objectives are to assure that capital levels are considered strong, to support underlying risk positions, and allow it to continue its operations as a credit intermediary. To do so, the CAP assesses both point-in-time and forecasted capital ratios. Huntington understands that the appropriate level of capital cannot be determined solely through the application of quantitative criteria for "adequately" and "well-capitalized" levels. Huntington is independently responsible for assessing its own capital adequacy based on its risk profile and business model.

In building its CAP, Risk Management and Finance may establish working groups to facilitate day-to-day work and resolve and/or recommend solutions to issues that arise as a result of CAP enhancements. Recommendations and updates from working groups are reported to the Capital Management Committee and, as applicable, to the Risk Oversight Committee of the Board of Directors.

Risk-weighted assets represent an institution's on-balance sheet assets and off-balance sheet exposures, weighted according to the risk associated with each exposure category. The risk-weighted asset calculation is used in determining the institution's capital requirement.

Huntington Bancshares Incorporated
Basel III Regulatory Capital Disclosures

The following table shows risk-weighted assets by exposure types:

Risk Weighted Assets	March 31, 2016
<i>(dollar amounts in thousands)</i>	
On-balance sheet assets:	
Exposure to sovereign entities ⁽¹⁾	\$ 726,198
Exposures to certain supranational entities and MDBs	—
Exposure to depository institutions, foreign banks and credit unions	433,475
Exposures to public sector entities (PSE)	764,119
Corporate exposures	24,881,061
Residential mortgage exposures	10,642,320
Statutory multifamily mortgages and pre-sold construction loans	477,002
High volatility commercial real estate (HVCRE) loans	857,682
Past due exposures	562,727
Other loans	9,593,936
Default fund contributions	—
Securitization exposures	747,805
Equity exposures	560,080
Trading & Other Assets	3,584,693
Off-balance sheet:	
Commitments	4,945,847
OTC Derivatives	523,870
Cleared transactions	585
Securitization Exposures	—
Letters of credit	483,531
Unsettled transactions	—
Other Off Balance Sheet Items	12,993
Total Standardized Risk Weighted Assets	\$ 59,797,924
Common Equity Tier 1 Capital Ratio	
Huntington Bancshares Incorporated	9.7337 %
Huntington National Bank	9.2401 %
Tier 1 Risk-Based Capital Ratio	
Huntington Bancshares Incorporated	10.9938 %
Huntington National Bank	9.4970 %
Total Risk-Based Capital Ratio	
Huntington Bancshares Incorporated	13.1679 %
Huntington National Bank	11.3711 %
Tier 1 Leverage Ratio	
Huntington Bancshares Incorporated	9.2865 %
Huntington National Bank	8.0234 %

(1) HBI's sovereign exposure is predominantly to the U.S. government and its agencies.

Note: Huntington is not subject to the Market Risk requirements under subpart F of the final rule.

HBI's capital ratios are presented in MD&A Table 21 – Regulatory Capital Data, in our 2016 First Quarter Report on Form 10-Q.

Huntington Bancshares Incorporated
Basel III Regulatory Capital Disclosures

Table 4: Capital Conservation Buffer

The capital conservation buffer is mandatory regulatory capital that financial institutions are required to hold in addition to the other minimum capital requirements. Basel III guidelines state a banking organization would need to hold a capital conservation buffer in an amount greater than 2.5% of total risk-weighted assets over the regulatory “well-capitalized” minimums to avoid limitations on capital distributions and discretionary bonus payments to executive officers. HBI is subject to the capital conservation buffer requirements, which is phased-in, as detailed below:

	2016	2017	2018	2019
Capital conservation buffer	0.625 %	1.25 %	1.875 %	2.5 %

The capital conservation buffer of a banking organization is the lowest of the following three ratios: The common equity tier 1 capital ratio minus its minimum common equity tier 1 capital ratio, the tier 1 capital ratio minus its minimum tier 1 capital ratio and the total capital ratio minus its minimum total capital ratio. The capital conservation buffer calculations for Huntington Bancshares Incorporated and Huntington National Bank are shown in the tables below. The capital conservation buffers were 4.9938% and 3.3713% respectively. As a result of the calculations for both organizations, there are no limitations on distributions and discretionary bonus payments under the capital conservation buffer framework. The disclosure requirements of the Capital Conservation Buffer are available in Huntington's FR Y-9C Schedule HC-R Part I. and Call Report Schedule RC-R Part I.

Huntington Bancshares Incorporated

March 31, 2016

	Capital Ratio	Minimum Capital Requirement	Capital Conservation Buffer	Minimum Capital Conservation Buffer Requirement
Common Equity Tier 1 Capital	9.7337 %	4.5000 %	5.2337 %	0.6250 %
Tier 1 Capital	10.9938	6.0000	4.9938	0.6250
Total Capital	13.1679	8.0000	5.1679	0.6250

Huntington National Bank

March 31, 2016

	Capital Ratio	Minimum Capital Requirement	Capital Conservation Buffer	Minimum Capital Conservation Buffer Requirement

Table 5: Credit Risk: General Disclosures

The following credit risk policies are described in Note 1 to the Consolidated Financial Statements included in our 2015 Annual Report on Form 10-K:

- a. Policy for determining past due or delinquency status
- b. Policy for placing loans on nonaccrual status
- c. Policy for returning loans to accrual status
- d. Definition of and policy for identifying impaired loans
- e. Description of the methodology that HBI uses to estimate its allowance for loan and lease losses
- f. Policy for charging-off uncollectible amounts

Discussion of HBI's credit risk management process is presented in the 2016 First Quarter Report on Form 10-Q in the Credit Risk section of MD&A.

Table 5B: Total Credit Risk Exposures

<i>(dollar amounts in thousands)</i>	Credit Exposure March 31, 2016			Average Balance

Table 6: General Disclosure for Counterparty Credit Risk-Related Exposures

We offer risk management products that enable customers to hedge various forms of financial risks including interest rate risk, foreign currency translation risk and commodity price risk. We also act as an intermediary between customers and money-center banks (primarily North American and European) enabling customers to access financial products (and hedge risk). Huntington's product suite enables customers to better control business risk and deepens relationships.

Prior to executing an OTC transaction, the financial strength of a potential counterparty is established using a risk rating methodology approved by the Credit Policy and Strategy Committee (reporting to the Board of Directors). The methodology is the same as that used to make lending decisions for commercial customers and similar for financial institution counterparties. Credit ratings are developed and exposure limits are established no less than annually that reflects our assessment of the financial strength of the counterparty.

The Bank uses an internal model to determine the potential future exposure (PFE) of OTC derivatives which is used to calculate the total credit exposure. As Huntington is subject to the Standardized Approach, RWA for OTC derivatives is determined using the methodology prescribed in the Final Rule for calculating PFE, and not our internal model.

To mitigate our exposure, collateral agreements are required for financial institution counterparties. These agreements consist of industry standard contracts (ISDA and Credit Support Annex agreements) that detail (inter alia) collateral requirements, acceptable collateral types, an unambiguous method for valuing collateral, as well as 'haircuts'. Daily collateral management activities are performed by a specialized Corporate Treasury team according to the legally enforceable contracts. The primary types of collateral taken in these contracts include cash, U.S. T-Bill, U.S. T-Note, U.S. T-Bond and U.S. Government Agency Securities.

Collateral agreements are not dependent on the credit ratings of the Bank or its counterparties. Rather, existing collateral agreements require Huntington and counterparty institutions to maintain 'well-capitalized' status (by regulatory standards). Failure to maintain 'well-capitalized' status is considered an early termination event and will likely result in a termination of the relationship.

Consistent with GAAP, an allowance is established to reflect the potential for losses associated with customer's unrealized losses on OTC contracts. A two-year cumulative probability of default metric is multiplied by unrealized customer losses to reflect a loss emergence period of two years.

<i>(dollar amounts in thousands)</i>	March 31, 2016
OTC Derivatives	
Gross Positive Fair Value	\$ 487,480
Net Unsecured Credit Exposure (1)	712,387

Total	\$ 10,971,978	\$ 787,699

(1) Includes Credit Participation Swaps

Table 8: Securitizations

Huntington utilizes automobile loan securitizations primarily to manage its aggregate concentration in originated indirect automobile loans as well as for diversifying its liquidity sources. Our risk management organization plays an active role in the review and oversight of this exposure which includes on-balance sheet portfolio loans, off-balance sheet auto loans due to sales or securitizations which we continue to service and on-balance sheet investments in automobile loan asset-backed securities. We do not engage in synthetic or re-securitization activities.

During the 2015 second quarter, we transferred \$750 million in auto loans to trusts in a securitization transaction. During 2011 and 2012, we transferred automobile loans totaling \$3.3 billion to trusts in three separate securitization transactions. The securitizations and the resulting sale of all underlying securities, including the residual interest certificates, were accounted for as sales. Huntington has concluded that it is not the primary beneficiary of these trusts because it has neither the obligation to absorb losses of the entities that could potentially be significant to the Variable Interest Entities (VIEs) nor the right to receive benefits from the entities that could potentially be significant to the VIEs. Huntington is not required and does not currently intend to provide any additional financial support to the trusts. Investors and creditors only have recourse to the assets held by the trusts. Huntington is the servicer of all indirect automobile loans that have been securitized and, as a result, the only on-balance sheet interest Huntington holds in the VIEs relates to capitalized servicing rights with a total carrying value of \$6.8 million at March 31, 2016, which represented our maximum exposure to loss. For information on our

Huntington Bancshares Incorporated
Basel III Regulatory Capital Disclosures

2016 activity and realized gains or loss on sales of financial assets in securitizations, see Note 7 – Loan Sales and Securitizations, and Note 15 – VIEs, in our 2016 First Quarter Report on Form 10-Q.

Prior to securitization, the underlying loans are classified as loans held for sale and are accounted for at the lower of cost or fair value. Gain or loss is recorded at the time of closing of the securitization transaction and the sale of all securities, including the residual interest certificates. The outstanding principal balance of securitized automobile loans at March 31, 2016 was \$0.6 billion. This amount is not representative of our risk of loss but is presented for the purpose of providing information as to the extent of our securitization activities.

See Note 1 – Significant Accounting Policies to the Consolidated Financial Statements included in our 2015 Annual Report on Form 10-K for our accounting policy on transfers of financial assets and securitizations. See Note 7 – Loans Sales and Securitizations and Note 15 – VIEs in our 2016 First Quarter Report on Form 10-Q for additional information on securitization activities.

The following table represents exposures receiving securitization capital treatment. The amounts below include traditional securitizations. Approximately \$7.1 million, or 6.0%, in Lease exposures were past due at March 31, 2016. Net charge-offs on Lease exposures were \$1.3 million for the 2016 first quarter. HBI does not have any synthetic securitization exposures.

Securitization Exposures and related Risk-Weighted Assets by Exposure Type:

<i>(dollar amounts in thousands)</i>	As of March 31, 2016		
	Exposure Amount (EAD)		
	On-balance sheet	Off-balance sheet	Total EAD
Leases (1)	\$ 128,138	\$ —	\$ 128,138

Table 9: Equities not Subject to Market Risk Capital Rules

Equity investments held at HBI include AFS equity securities, private equity investments, and other equity investments classified within other assets.

Non marketable equity securities are recorded at historical cost, and marketable equity securities are recorded as available-for-sale and carried at fair value with unrealized net gains or losses reported within other comprehensive income / (loss) in shareholders' equity. Low Income Housing Tax Credit investments are included in accrued income and other assets and the majority of these investments are accounted for using the proportional amortization method. Investments that do not meet the requirements of the proportional amortization method and other miscellaneous equity investments are generally accounted for using the equity method.

Summary of Equity Investment Exposures

Huntington's equity exposures not subject to the Market Risk rule include the following investments:

- Low Income Housing Tax Credit Investments – see Note 15 – VIEs in our 2016 First Quarter Report on Form 10-Q for additional information on affordable housing tax credit investments.
- Other Miscellaneous Equity Investments – New Market Tax Credit Investments, Historic Tax Credit Investments, Small Business Investment Companies, Rural Business Investment Companies, certain equity method investments and other miscellaneous investments.
- Federal Reserve Bank and Federal Home Loan Bank stock, which are considered equity exposures under the regulatory capital framework.

Equity Securities Not Subject to Market Risk Rule:

	March 31, 2016		
<i>(dollar amounts in thousands)</i>	Nonpublic	Publicly Traded	Total
Amortized cost	\$ 861,612	\$ 523	\$ 862,135
Unrealized gains/losses	—	374	374
Latent revaluation gains/losses (a)	—	—	—
Fair value	\$ 861,612	\$ 897	\$ 862,509

(a) The unrealized gains/(losses) not recognized either in the balance sheet or through earnings.

There were no net realized gains or losses arising from sales and liquidations of equity investments for the quarter ended March 31, 2016. Total net unrealized gains on available-for-sale equity investments recognized in accumulated other comprehensive income were \$374 thousand as of March 31, 2016.

Capital Requirements for Equity Securities Not Subject to Market Risk Rule:

	March 31, 2016	
<i>(dollar amounts in thousands)</i>	Exposure	Risk Weighted Assets
0%	\$ 176,436	\$ —
20%	157,024	31,405
100%	528,675	528,675
Full look-through approach	—	—
Total	\$ 862,135	\$ 560,080

Table 10: Interest Rate Risk for Non-Trading Activities
