RWA	Risk Weighted Assets
SPE	Special Purpose Entity
SSFA	Simplified Supervisory Formula Approach
T-Bill	Treasury Bill
T-Bond	Treasury Bond
T-Note	Treasury Note
VIE	Variable Interest Entity

Introduction

Company Overview

Huntington Bancshares Incorporated (Huntington or HBI) is a multi-state diversified regional bank holding company organized under Maryland law in 1966 and headquartered in Columbus, Ohio. Huntington has 15,599 average full-time equivalent employees. Through its bank subsidiary, The Huntington National Bank (the Bank), HBI has over 150 years of serving the financial needs of our customers. Through its subsidiaries, including the Bank, Huntington provides full-service commercial, small business, consumer banking services, mortgage banking services, automobile financing, recreational vehicle and marine financing, equipment leasing, investment management, trust services, brokerage services, insurance programs, and other financial products and services. The Bank, organized in 1866, is our only banking subsidiary. Huntington’s banking offices are located in Ohio, Illinois, Indiana, Kentucky, Michigan, Pennsylvania, West Virginia, and Wisconsin. As of March 31, 2018, the Bank had 966 branches and private client group offices.

Select financial services and other activities are also conducted in various other states. International banking services are available through the headquarters office in Columbus, Ohio. Our foreign banking activities, in total or with any individual country, are not significant.

When we refer to “we”, “our”, and “us” in this report, we mean Huntington Bancshares Incorporated and our consolidated subsidiaries. When we refer to the “Bank” in this report, we mean our only bank subsidiary, The Huntington National Bank, and its subsidiaries.

The Board of Governors of the Federal Reserve System (Federal Reserve Board) is the primary regulator of HBI, a bank holding company under the Bank Holding Company Act of 1956 (BHC Act). As a bank holding company, HBI is subject to consolidated risk-based regulatory capital requirements which are computed in accordance with the applicable risk-based capital regulations of the Federal Reserve Board. These capital requirements are expressed as capital ratios that compare measures of regulatory capital to risk-weighted assets (RWA). Capital levels are subject to qualitative judgments by the regulators on capital components, risk weightings and other factors. In addition, we are subject to requirements with respect to leverage.

Regulatory Capital and Capital Ratios

In 2013, the Federal Reserve voted to adopt final capital rules implementing Basel III requirements for U.S. Banking organizations. The final rules establish an integrated regulatory capital framework and implement in the United States the Basel III regulatory capital reforms from the Basel Committee on Banking Supervision and certain changes required by the Dodd-Frank Act. Under the final rule, minimum requirements increase for both the quantity and quality of capital held by banking organizations. Consistent with the international Basel framework, the final rule includes a new minimum ratio of common equity Tier 1 capital to risk-weighted assets and a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets. The rule also raises the minimum ratio of Tier 1 capital to risk-weighted assets and includes a minimum leverage ratio of 4%. These new minimum capital ratios were effective for us on January 1, 2015, and will be fully phased-in on January 1, 2019. We are subject to the standardized approach for calculating risk-weighted assets in accordance with subpart D of the final rule.

The following are the minimum Basel III regulatory capital levels, including a capital conservation buffer beginning in 2016, which we must satisfy to avoid limitations on capital distributions and discretionary bonus payments during the applicable transition period, from January 1, 2015, until January 1, 2019:

	Basel III Regulatory Capital Levels				
	January 1, 2015	January 1, 2016	January 1, 2017	January 1, 2018	January 1, 2019
Common equity tier 1 risk-based capital ratio	4.5 %	5.125 %	5.75 %	6.375 %	7.0 %
Tier 1 risk-based capital ratio	6.0 %	6.625 %	7.25 %	7.875 %	8.5 %
Total risk-based capital ratio	8.0 %	8.625 %	9.25 %	9.875 %	10.5 %

The final rule emphasizes common equity tier 1 capital, the most loss-absorbing form of capital, and implements strict eligibility criteria for regulatory capital instruments. The final rule also modifies the methodology for calculating risk-weighted assets to enhance risk sensitivity. Banks and regulators use risk weighting to assign different levels of risk to different classes of assets.

Scope of Application

The Basel III Regulatory Capital Disclosures and HBI's regulatory capital ratio calculations are prepared on a fully consolidated basis. The consolidated financial statements are prepared in accordance with U.S. GAAP and include the accounts of HBI and its majority-owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation. HBI is subject to the standardized approach for calculating risk-weighted assets.

Restrictions on the Transfer of Funds or Regulatory Capital within HBI

Dividends from the Bank to HBI are the primary source of funds for payment of dividends to our shareholders. However, there are statutory limits on the amount of dividends that the Bank can pay to HBI. Regulatory approval is required prior to the declaration of any dividends in an amount greater than its undivided profits or if the total of all dividends declared in a calendar year would exceed the total of its net income for the year combined with its retained net income for the two preceding years, less any required transfers to surplus or common stock. The Bank is currently able to pay dividends to HBI subject to these limitations.

Compliance with Capital Requirements

As of March 31, 2018, HBI had capital levels above the minimum regulatory capital requirements, as well as the well-capitalized standards established for prompt corrective action. For further detail on capital ratios, see Table 15 – Regulatory Capital Data in the 2018 First Quarter Report on Form 10-Q. Also, the aggregate amount of surplus capital in our insurance subsidiaries included in HBI consolidated Total Capital as of March 31, 2018 was \$11 million. No subsidiary had a capital shortfall relative to its minimum regulatory capital requirements as of this reporting date.

Capital Structure

Common equity (i.e., common stock, capital surplus, and retained earnings) is the primary component of our capital structure. Common equity allows for the absorption of losses on an ongoing basis and is permanently available for this purpose. Further, common equity allows for the conservation of resources during stress, as it provides HBI with full discretion on the amount and timing of dividends and other distributions.

However, regulators and rating agencies include other non-common forms of capital (e.g., subordinated debt and preferred stock) in their calculations of capital adequacy. Accordingly, Huntington allows for the inclusion of these alternative forms of capital in its metrics for the Tier 1 risk based capital and total risk based capital ratios.

The terms and conditions of HBI’s capital instruments are described in the 2017 Annual Report on Form 10-K and 2018 First Quarter Report on Form 10-Q as follows:

- Common stock terms and conditions are described on the Balance Sheet in HBI’s Consolidated Financial Statements.
- Preferred stock terms and conditions are described in Note 9 - Shareholders' Equity in the 2018 First Quarter Report on Form 10-Q.
- Trust preferred securities terms and conditions are described in Note 15 - VIEs in the 2018 First Quarter Report on Form 10-Q.
- Subordinated debt terms and conditions are described in Note 11 - Long-Term Debt in the 2017 Annual Report on Form 10-K.

The components of HBI’s capital structure are disclosed in the table below:

Capital Components	March 31, 2018
<i>(in millions)</i>	
Common equity Tier 1 risk-based capital:	
Common stock plus related surplus	\$ 9,997
Retained Earnings	780
Goodwill and other intangibles, net of related taxes	(2,244)
Deferred tax assets that arise from tax loss and credit carryforwards	(29)
Common equity Tier 1 capital	8,504
Additional Tier 1 capital:	
Shareholders’ preferred equity	1,208
Tier 1 capital	9,712
Tier 2 capital instruments plus related surplus	566
Total capital minority interest that is not included in Tier 1 capital	238
Qualifying allowance for loan and lease losses	806
Tier 2 capital	1,610
Total risk-based capital	\$ 11,322

Capital Adequacy

We utilize a capital adequacy process (CAP) which, at a minimum, addresses requirements set forth in the Federal Reserve's *Seven Principles of an Effective Capital Adequacy Process*:

1. Sound foundational risk management
2. Effective loss estimation methodologies
3. Solid resource estimation methodologies
4. Sufficient capital adequacy impact assessment
5. Comprehensive capital policy and planning
6. Robust internal controls
7. Effective governance

Huntington's CAP objectives are to assure that capital levels are considered strong, to support underlying risk positions, and allow it to continue its operations as a credit intermediary. To do so, the CAP assesses both point-in-time and forecasted capital ratios. Huntington understands that the appropriate level of capital cannot be determined solely through the application of quantitative criteria for "adequately" and "well-capitalized" levels. Huntington is independently responsible for assessing its own capital adequacy based on its risk profile and business model.

In building the CAP, Risk Management and Finance may establish working groups to facilitate day-to-day work and resolve and/or recommend solutions to challenges that arise as a result of CAP enhancements. Recommendations and updates from working groups are reported to the Capital Management Committee and, as applicable, to the Risk Oversight Committee of the Board of Directors.

Risk-weighted assets represent an institution's on-balance sheet assets and off-balance sheet exposures, weighted according to the risk associated with each exposure category. The risk-weighted asset calculation is used in determining the institution's capital requirement.

Huntington Bancshares Incorporated
Basel III Regulatory Capital Disclosures

The following table shows risk-weighted assets by exposure types:

Risk Weighted Assets	March 31, 2018	
<i>(dollar amounts (in millions))</i>		
On-balance sheet assets:		
Exposure to sovereign entities ⁽¹⁾	\$	933
Exposures to certain supranational entities and MDBs		—
Exposure to depository institutions, foreign banks and credit unions		328
Exposures to public sector entities (PSE)		1,692
Corporate exposures		32,496
Other loans		16,403
Residential mortgage exposures		13,765
Statutory multifamily mortgages and pre-sold construction loans		875
High volatility commercial real estate (HVCRE) loans		982
Past due exposures		331
Default fund contributions		—
Securitization exposures		105
Equity exposures		867
Trading & Other Assets		4,348
Off-balance sheet:		
Commitments		7,041
OTC Derivatives		636
Cleared transactions		3
Securitization Exposures		—
Letters of credit		553
Unsettled transactions		—
Other Off Balance Sheet Items		7
Total Standardized Risk Weighted Assets	\$	81,365
Common Equity Tier 1 Capital Ratio		
Huntington Bancshares Incorporated		10.45%
Huntington National Bank		10.74%
Tier 1 Risk-Based Capital Ratio		
Huntington Bancshares Incorporated		11.94%
Huntington National Bank		11.82%
Total Risk-Based Capital Ratio		
Huntington Bancshares Incorporated		13.91%
Huntington National Bank		14.03%
Tier 1 Leverage Ratio		
Huntington Bancshares Incorporated		9.53%
Huntington National Bank		9.46%

(1) HBI's sovereign exposure is predominantly to the U.S. government and its agencies.

Note: Huntington is not subject to the Market Risk requirements under subpart F of the final rule.

Capital Conservation Buffer

The capital conservation buffer is mandatory regulatory capital that financial institutions are required to hold in addition to the other minimum capital requirements. Basel III guidelines state a banking organization would need to hold a capital conservation buffer in an amount greater than 2.5% of total risk-weighted assets over the regulatory “well-capitalized” minimums to avoid limitations on capital distributions and discretionary bonus payments to executive officers. HBI is subject to the capital conservation buffer requirements, which is phased-in, as detailed below:

	2016	2017	2018	2019
Capital conservation buffer	0.63%	1.25%	1.88%	2.5%

The capital conservation buffer of a banking organization is the lowest of the following three ratios: the common equity Tier 1 capital ratio less its minimum common equity Tier 1 capital ratio; the Tier 1 capital ratio less its minimum Tier 1 capital ratio or the total capital ratio less its minimum total capital ratio. The capital conservation buffer calculations for Huntington Bancshares Incorporated and Huntington National Bank are shown in the tables below. The capital conservation buffers were 5.91% and 5.82%, respectively. As a result of the calculations for both organizations, there are no limitations on distributions and discretionary bonus payments under the capital conservation buffer framework. The disclosure requirements of the Capital Conservation Buffer are available in Huntington's FR Y-9C Schedule HC-R Part I and Call Report Schedule RC-R Part I.

Huntington Bancshares Incorporated

March 31, 2018

	Capital Ratio	Minimum Capital Requirement	Capital Conservation Buffer	Minimum Capital Conservation Buffer Requirement
Common Equity Tier 1 Capital	10.45%	4.50%	5.95%	1.88%
Tier 1 Capital	11.94%	6.00%	5.94%	1.88%
Total Capital	13.91%	8.00%	5.91%	1.88%

Huntington National Bank

	Capital Ratio	Minimum Capital Requirement	Capital Conservation Buffer	Minimum Capital Conservation Buffer Requirement
Common Equity Tier 1 Capital	10.74%	4.50%	6.24%	1.88%
Tier 1 Capital	11.82%	6.00%	5.82%	1.88%
Total Capital	14.03%	8.00%	6.03%	1.88%

Credit Risk: General Disclosures

The following credit risk policies are described in Note 1 to the Consolidated Financial Statements included in our 2017 Annual Report on Form 10-K:

- a. Policy for determining past due or delinquency status
- b. Policy for placing loans on nonaccrual status
- c. Policy for returning loans to accrual status
- d. Definition of and policy for identifying impaired loans
- e. Description of the methodology that HBI uses to estimate its allowance for loan and lease losses
- f. Policy for charging-off uncollectible amounts.

Discussion of HBI's credit risk management process is presented in the 2017 Annual Report on Form 10-K in the Credit Risk section of MD&A.

Impaired or Past Due Loans by Major Industry or Counterparty Type and Charge-off Information

Disclosures of amounts of impaired loans for which there was a related allowance under GAAP, amounts of impaired loans for which there was no related allowance under GAAP, and the balance of allowance for loan losses disaggregated on the basis of the impairment method are presented in Note 3 – Loans / Leases and Allowance for Credit Losses in the 2018 First Quarter Report on Form 10-Q.

Discussion of HBI's charge-offs during the period is presented in MD&A Table 11 – Quarterly Net Charge-Off Analysis in the 2018 First Quarter Report on Form 10-Q.

Disclosures on the amount of loans past due 90 days and on nonaccrual, and loans past due 90 days and still accruing are presented in Note 3 – Loans / Leases and Allowance for Credit Losses in the 2018 First Quarter Report on Form 10-Q.

General Disclosure for Counterparty Credit Risk-Related Exposures

We offer risk management products that enable customers to hedge various forms of financial risks including interest rate risk, foreign currency translation risk and commodity price risk. We also act as an intermediary between customers and money-center banks (primarily North American and European) enabling customers to access financial products (and hedge risk). Huntington’s product suite enables customers to better control business risk and deepens relationships.

Prior to executing an OTC transaction, the financial strength of a potential counterparty is established using a risk rating methodology approved by the Credit Policy and Strategy Committee (reporting to the Board of Directors). The methodology is the same as that used to make lending decisions for commercial customers and similar for financial institution counterparties. Credit ratings are developed and exposure limits are established no less than annually that reflects our assessment of the financial strength of the counterparty.

The Bank uses an internal model to determine the potential future exposure (PFE) of OTC derivatives which is used to calculate the total credit exposure. As Huntington is subject to the Standardized Approach, RWA for OTC derivatives is determined using the methodology prescribed in the Final Rule for calculating PFE, and not our internal model.

To mitigate our exposure, collateral agreements are required for financial institution counterparties. These agreements consist of industry standard contracts (ISDA and Credit Support Annex agreements) that detail such terms as collateral requirements, acceptable collateral types, an unambiguous method for valuing collateral, as well as ‘haircuts’. Daily collateral management activities are performed by a specialized Corporate Treasury team according to the legally enforceable contracts. The primary types of collateral taken in these contracts include cash, U.S. T-Bill, U.S. T-Note, U.S. T-Bond, and U.S. Government Agency Securities.

Collateral agreements are not dependent on the credit ratings of the Bank or its counterparties. Rather, existing collateral agreements require Huntington and counterparty institutions to maintain ‘well-capitalized’ status (by regulatory standards). Failure to maintain ‘well-capitalized’ status is considered an early termination event and will likely result in a termination of the relationship.

Consistent with GAAP, an allowance is established to reflect the potential for losses associated with customer’s unrealized losses on OTC contracts. A two-year cumulative probability of default metric is multiplied by unrealized customer losses to reflect a loss emergence period of two years.

(1) Represents the amount of credit exposure that is reduced due to the netting of offsetting positive and negative exposures where a valid master netting agreement exists, and collateral held.

(2) Includes Credit Participation Swaps

The Bank periodically enters into credit participation swaps to transfer counterparty credit risk related to interest rate swaps to and from other financial institutions. Under the terms of these agreements, the “participating bank” receives a fee from the “lead bank” in exchange for the guarantee of reimbursements if the customer defaults on an interest rate swap. The interest rate swap is transacted such that any and all exchanges of interest payments (favorable and unfavorable) are made between the lead bank and the customer. In the event of an early termination of the swap and the customer is unable to make the required close out payment, the participating bank assumes that obligation and is required to make this payment.

Credit Risk Mitigation

Discussion of HBI's credit risk mitigation policies and processes is presented in the Credit Risk section of MD&A in the 2017 Annual Report on Form 10-K.

Exposures covered by eligible financial collateral after application of haircuts:

<i>(in millions)</i>	March 31, 2018	
Exposure Type		
Loans/Leases	\$	1,274
Derivatives ⁽¹⁾		178
Repo-style transactions		169
Total	\$	1,621

(1) Includes Derivatives, Investing, and Trading Activities

Exposures covered by guarantees and credit derivatives with associated risk weighted amount:

<i>(in millions)</i>	March 31, 2018			
Exposure Type	Exposure Amount		Risk Weighted Asset Amount	
AFS/HTM Securities ⁽¹⁾	\$	21,018	\$	1,260
Loans		331		15
Letters of Credit		40		8
Other ⁽²⁾		59		59
Total	\$	21,448	\$	1,342

(1) Includes U.S. Government Agencies and Government Sponsored Entity Securities.

(2) Includes Credit Participation Swaps.

Securitizations

Huntington utilizes automobile loan securitizations primarily to manage its aggregate concentration in originated indirect automobile loans as well as for diversifying its liquidity sources. Our risk management organization plays an active role in the review and oversight of this exposure which includes on-balance sheet portfolio loans, off-balance sheet auto loans due to sales or securitizations which we continue to service and on-balance sheet investments in automobile loan asset-backed securities. We do not engage in synthetic or re-securitization activities.

During the 2016 fourth quarter and 2015 second quarter, we transferred \$1,500 million and \$750 million respectively of auto loans to trusts in securitization transactions. The securitizations and the resulting sale of all underlying securities, including the residual interest certificates, were accounted for as sales. Huntington has concluded that it is not the primary beneficiary of these trusts because it has neither the obligation to absorb losses of the entities that could potentially be significant to the Variable Interest Entities (VIEs) nor the right to receive benefits from the entities that could potentially be significant to the VIEs. Huntington is not required and does not currently intend to provide any additional financial support to the trusts. Investors and creditors only have recourse to the assets held by the trusts. Huntington is the servicer of all indirect automobile loans that have been securitized and, as a result, the only on-balance sheet interest Huntington holds in the VIEs relates to capitalized servicing

Huntington Bancshares Incorporated
Basel III Regulatory Capital Disclosures

rights with a total carrying value of \$6 million at March 31, 2018, which represented our maximum exposure to loss. For information on our 2018 activity and realized gains or loss on sales of financial assets in securitizations, see Note 7 – Loan Sales and Securitizations, and Note 15 – VIEs, in our 2018 First Quarter Report on Form 10-Q.

Prior to securitization, the underlying loans are classified as loans held for sale and are accounted for at the lower of cost or fair value. Gain or loss is recorded at the time of closing of the securitization transaction and the sale of all securities, including the residual interest certificates. The outstanding principal balance of securitized automobile loans at March 31, 2018 was \$0.9 billion. This amount is not representative of our risk of loss but is presented for the purpose of providing information as to the extent of our securitization activities.

See Note 1 - Significant Accounting Policies to the Consolidated Financial Statements included in our 2017 Annual Report on Form 10-K for our accounting policy on transfers of financial assets and securitizations. See Note 7 - Loan Sales and Securitizations and Note 15 - VIEs in our 2018 First Quarter Report on Form 10-Q for additional information on securitization activities.

The following table represents exposures receiving securitization capital treatment. The amounts below include traditional securitizations as HBI does not have any synthetic securitization exposures.

Securitization Exposures and related Risk-Weighted Assets by Exposure Type:

<i>(in millions)</i>	March 31, 2018		
	Exposure Amount (EAD)		
	On-balance sheet	Off-balance sheet	Total EAD

>100% - 1250%	—		—
Total	\$ 105	\$ 105	105

Equities not Subject to Market Risk Capital Rules

Equity investments held at HBI include marketable equity securities, private equity investments, and other equity investments classified within other assets.

Non-marketable equity securities are recorded at historical cost, and marketable equity securities are carried at fair value with unrealized net gains or losses reported within income. Low Income Housing Tax Credit investments are included in accrued income and other assets and the majority of these investments are accounted for using the proportional amortization method. Investments that do not meet the requirements of the proportional amortization method and other miscellaneous equity investments are generally accounted for using the equity method.

Summary of Equity Investment Exposures

Huntington's equity exposures not subject to the Market Risk rule include the following investments:

- Low Income Housing Tax Credit Investments - see Note 15 - VIEs in our 2018 First Quarter Report on Form 10-Q for additional information on affordable housing tax credit investments.
- Other Miscellaneous Equity Investments - New Market Tax Credit Investments, Historic Tax Credit Investments, Small Business Investment Companies, Rural Business Investment Companies, certain equity method investments and other miscellaneous investments.
- Federal Reserve Bank and Federal Home Loan Bank stock, which are considered equity exposures under the regulatory capital framework.

Equity Securities Not Subject to Market Risk Rule:

<i>(in millions)</i>	March 31, 2018		
	Nonpublic	Publicly Traded	Total
Amortized cost	\$ 1,390	\$ 1	\$ 1,391
Unrealized gains/losses	—	1	1
Latent revaluation gains/losses ⁽¹⁾	—	—	—
Fair value	\$ 1,390	\$ 2	\$ 1,392

(1) The unrealized gains/(losses) not recognized either in the balance sheet or through earnings.

There were no net realized gains or losses arising from sales and liquidations of equity investments for the quarter ended March 31, 2018.

Capital Requirements for Equity Securities Not Subject to Market Risk Rule:

<i>(in millions)</i>	March 31, 2018	
	Exposure	Risk Weighted Assets
0%	\$ 294	\$ —
20%	287	57

 Basel III regulatory Capital Disclosures
 March 31, 2018

Table	Disclosure Requirement	Disclosure Location
1. Scope of Application		
Qualitative		
A	The name of the top corporate entity in the group to which the Risk Based Capital Standards apply.	Basel III Regulatory Capital Disclosures: Introduction and Scope of Application
B	A brief description of the differences in the basis for consolidating entities for accounting and regulatory purposes, with a description of those entities: (1) That are fully consolidated; (2) That are deconsolidated and deducted from total capital; (3) For which the total capital requirement is deducted; and (4) That are neither consolidated nor deducted (for example, where the investment in the entity is assigned a risk weight in accordance with this subpart).	Not applicable. HBI does not have differences in the basis of consolidation for accounting and regulatory purposes.
C	Any restrictions, or other major impediments, on transfer of funds or total capital within the group.	Basel III Regulatory Capital Disclosures: Scope of Application
Quantitative		
D	The aggregate amount of surplus capital of insurance subsidiaries included in the total capital of the consolidated group.	Basel III Regulatory Capital Disclosures: Scope of Application
E	The aggregate amount by which actual total capital is less than the minimum total capital requirement in all subsidiaries, with total capital requirements and the name(s) of the subsidiaries with such deficiencies.	Basel III Regulatory Capital Disclosures: Scope of Application
2. Capital Structure		
Qualitative		
A	Summary information on the terms and conditions of the main features of all regulatory capital instruments.	Basel III Regulatory Capital Disclosures: Capital Structure 2018 First Quarter Report on Form 10-Q: (1) Note 9 - Shareholders' Equity 2017 Annual Report on Form 10-K: (2) Note 11 - Long Term Debt
Quantitative		
B	The amount of common equity Tier 1 capital, with separate disclosure of: (1) Common stock and related surplus; (2) Retained earnings; (3) Common equity minority interest; (4) AOCI; and (5) Regulatory adjustments and deductions made to common equity Tier 1 capital	Basel III Regulatory Capital Disclosures: Capital Structure

Table	Disclosure Requirement	Disclosure Location
2. Capital Structure, continued		
C	The amount of Tier 1 capital, with separate disclosure of: (1) Additional Tier 1 capital elements, including additional Tier 1 capital instruments and Tier 1 minority interest not included in common equity Tier 1 capital; and (2) Regulatory adjustments and deductions made to Tier 1 capital.	Basel III Regulatory Capital Disclosures: Capital Structure
D	The amount of total capital, with separate disclosure of: (1) Tier 2 capital elements, including Tier 2 capital instruments and total capital minority interest not included in Tier 1 capital; and (2) Regulatory adjustments and deductions made to total capital.	Basel III Regulatory Capital Disclosures: Capital Structure
3. Capital Adequacy		
Qualitative		
A	A summary discussion of the bank holding company's approach to assessing the adequacy of its capital to support current and future activities.	Basel III Regulatory Capital Disclosures: Capital Adequacy
Quantitative		
B	Risk-weighted assets for: (1) Exposures to sovereign entities; (2) Exposures to certain supranational entities and MDBs; (3) Exposures to depository institutions, foreign banks, and credit unions; (4) Exposures to PSEs; (5) Corporate exposures; (6) Residential mortgage exposures; (7) Statutory multifamily mortgages and pre-sold construction loans; (8) HVCRE loans; (9) Past due loans; (10) Other assets; (11) Cleared transactions; (12) Default fund contributions; (13) Unsettled transactions; (14) Securitization exposures; and (15) Equity exposures	Basel III Regulatory Capital Disclosures: Capital Adequacy
C	Standardized market risk-weighted assets as calculated under subpart F	Not applicable. HBI is not subject to the Market Risk requirements
D	Common equity Tier 1, Tier 1 and total risk-based capital ratios: (1) For the top consolidated group; and (2) For each depository institution subsidiary.	Basel III Regulatory Capital Disclosures: Capital Adequacy
E	Total standardized risk-weighted assets.	Basel III Regulatory Capital Disclosures: Capital Adequacy
4. Capital Conservation Buffer		
Qualitative		
A	At least quarterly, the bank holding company must calculate and publicly disclose the capital conservation buffer as described under §1.11.	Basel III Regulatory Capital Disclosures: Capital Conservation Buffer

Huntington Bancshares Incorporated
Basel III Regulatory Capital Disclosures

Table	Disclosure Requirement	Disclosure Location
4. Capital Conservation Buffer, continued		
Quantitative		
B	At least quarterly, the bank holding company must calculate and publicly disclose the eligible retained income of the bank holding company, as described under §1.11.	Basel III Regulatory Capital Disclosures: Capital Conservation Buffer
C	At least quarterly, the bank holding company must calculate and publicly disclose any limitations it has on distributions and discretionary bonus payments resulting from the capital conservation buffer framework described under §1.11, including the maximum payout amount for the quarter.	Basel III Regulatory Capital Disclosures: Capital Conservation Buffer
5. Credit Risk: General Disclosures		
Qualitative		
A	The general qualitative disclosure requirement with respect to credit risk (excluding counterparty credit risk disclosed in accordance with Table 6), including the: <ul style="list-style-type: none"> (1) Policy for determining past due or delinquency status; (2) Policy for placing loans on nonaccrual; (3) Policy for returning loans to accrual status; (4) Definition of and policy for identifying impaired loans (for financial accounting purposes); (5) Description of the methodology that the bank holding company uses to estimate its allowance for loan and lease losses, including statistical methods used where applicable; (6) Policy for charging-off uncollectible amounts; and (7) Discussion of the bank holding company's credit risk management policy. 	Basel III Regulatory Capital Disclosures: Credit Risk - General Discussions 2017 Annual Report on Form 10-K: (1) Note 1 - Significant Accounting Policies (2) Risk Management and Capital section of MD&A
Quantitative		
B	Total credit risk exposures and average credit risk exposures, after accounting offsets in accordance with GAAP, without taking into account the effects of credit risk mitigation techniques (for example, collateral and netting not permitted under GAAP), over the period categorized by major types of credit exposure. For example, banks could use categories similar to that used for financial statement purposes. Such categories might include, for instance: <ul style="list-style-type: none"> (1) Loans, off-balance sheet commitments, and other non-derivative off-balance sheet exposures; (2) Debt securities; and (3) OTC derivatives 	Basel III Regulatory Capital Disclosures: Credit Risk - General Discussions 2018 First Quarter Report on Form 10-Q: (1) Note 4 - Available-for-Sale Securities (2) Note 5 - Held-to-Maturity Securities
C	Geographic distribution of exposures, categorized in significant areas by major types of credit exposure. E	By major industry or counterparty type: (1) Amount of impaired loans for which there was a related allowance under GAAP; (2) Amount of impaired loans for which there was no related allowance under GAAP; (3) Amount of loans past due 90 days and on nonaccrual; (4) Amount of loans past due 90 days and still accruing; (5) The balance in the allowance for loan and lease losses at the end of each period, disaggregated on the basis of the bank's impairment method. To disaggregate the information required on the basis of impairment methodology, an entity shall separately disclose the amounts based on the requirements in GAAP; and (6) Charge-offs during the period.	Basel III Regulatory Capital Disclosures: Credit Risk - General Discussions 2018 First Quarter Report on Form 10-Q: (1) Note 3 - Loans / Leases and Allowance for Credit Losses (2) Table 11 - Quarterly Net Charge-Off Analysis
F	Amount of impaired loans and, if available, the amount of past due loans categorized by significant geographic areas including, if practical, the amounts of allowances related to each geographical area, further categorized as required by GAAP.	Basel III Regulatory Capital Disclosures: Credit Risk - General Discussions
G	Reconciliation of changes in ALLL.	2018 First Quarter Report on Form 10-Q: Note 3 - Loans and Leases and Allowances for Credit Losses
H	Remaining contractual maturity delineation (for example, one year or less) of the whole portfolio, categorized by credit exposure.	Basel III Regulatory Capital Disclosures: Credit Risk - General Discussions
6. General Disclosure for Counterparty Credit Risk-Related Exposures		
Qualitative		
A	The general qualitative disclosure requirement with respect to OTC derivatives, eligible margin loans, and repo-style transactions, including a discussion of: (1) The methodology used to assign credit limits for counterparty credit exposures; (2) Policies for securing collateral, valuing and managing collateral, and establishing credit reserves; (3) The primary types of collateral taken; and (4) The impact of the amount of collateral the bank would have to provide given a deterioration in the bank holding company's own creditworthiness.	Basel III Regulatory Capital Disclosures: General Disclosure for Counterparty Credit Risk-Related Exposures
Quantitative		
B	Gross positive fair value of contracts, collateral held (including type, for example, cash, government securities), and net unsecured credit exposure. A bank also must disclose the notional value of credit derivative hedges purchased for counterparty credit risk protection and the distribution of current credit exposure by exposure type.	Basel III Regulatory Capital Disclosures: General Disclosure for Counterparty Credit Risk-Related Exposures
C	Notional amount of purchased and sold credit derivatives, segregated between use for the bank's own credit portfolio and in its intermediation activities, including the distribution of the credit derivative products used, categorized further by protection bought and sold within each product group.	Basel III Regulatory Capital Disclosures: General Disclosure for Counterparty Credit Risk-Related Exposures
